

## MCCPTA Safety Committee Update

March 2007

Do you have concerns about traffic and pedestrian safety around your school? Come to the March 27 pre-Delegates Assembly program about school traffic and pedestrian safety. Find out how decisions are made about traffic light and crosswalk placement, school speed zones, and school site improvements to promote "safe access." Also hear about the "walk to school day initiative." The program will be in the Carver Auditorium Tuesday, March 27, 2007, from 7:00-8:00 p.m. The speakers will be:

Ray Trout, Site Development Coordinator for the Division of Construction in MCPS, who will talk about the "Improved Safe Access Program" for school sites;

Fred Lees, Manager, Traffic Engineering Studies for Montgomery County Dept of Public Works and Transportation, who will talk about traffic signal and crosswalk criteria, and school speed zones and signage; and

Delegate Bill Bronrott, who will talk about the "walk to school day" program.

Pam Moomau  
MCCPTA Safety Committee Chair
