

November 2007

Technology Committee

The Technology Committee continues to advocate with the local PTA's regarding concerns about Schools Websites and to raise administrator awareness of the importance of school web sites to parents.

The primary focus is to get the Schools and administration to understand the importance of instituting standards across all school web sites. The committee is also working with MCPS Web Services to implement the web publishing system for as many schools as possible in 2007/2008.
